SUBJECT Torpedo Factory at Fiume

INFO.

DIST. 21 February 1947

25X1A6a

PAGES

ORIGIN

SUPPLEMENT

25X1X6

1. The torpedo factory at Fiume has recently resumed torpedo trials, although the lighters employed for indicating the limits of fire during the trials have not yet been placed in operation. The torpedo launching stage, which is partly damaged, consists of two tubes, one 710 mm., the other 450 mm.
2. During the first trials a number of torpedoes were not recovered afloat. Sabotage was suspected and UDB (formerly OZNA) arrested a number of factory employees.
3. In addition to 450 mm. and 710 mm. torpedoes, the factory is, at present, engaged in producing diesel motors of German patent, parallel turning lathes, ploughs, and small household grain milling machines.
